SANTOSH KRISHNAN

Experience

American Computer Science League

In this competition, I was selected by the group leaders to go to the All-Star American Computer Science League Competition to represent the school in the competition in which the elite few in each school travel to compete against other United States and International schools for the top prize.

Virginia Math League/AMC

In the Virginia Math League Competition, I scored 32 out of 35 points on the contest exam and placed T4th/25th in the state that year. In addition, I was awarded Honor Roll for my 18 out 25 on the AMC8 and placed 2nd in my school in the AMC12.

Volunteering

I have logged over 50 hours of volunteer service in my community and religious community. I have helped set up, run, and clean up many events at the local schools and festivals along with running 5k's and other races benefitting organizations. In addition, I volunteer at the local temples by helping the priests themselves in the recitation of religious scriptures, prayers, and the running of rituals.

Latin Honor Society

In both my Freshman and Sophomore school year, I have been selected into the Latin Honors Society. This society recognizes students whose grades in Latin Courses are exemplary and maintain a 4.0 or greater class GPA for that year. Each year I have been selected into this honor society and is a prestigious honor society that helps the community through Latin.

Programming Skills

Languages: Python, Linux

Other Skills

Public Speaking, Electronic Circuit Board Building, and Tennis
